

## Project Manager (All Genders)

### Role Overview

At Ikaros Solar, a well-established, yet further growing player in the international field of renewable energies, focused on large-scale solar projects, we are offering the opportunity to join our team as **Project Manager**. You will be located in **United Kingdom (UK)**. You'll oversee the permitting process of large-scale solar projects from inception through to readiness for construction. If you have a strong background in project management within the renewable energy sector, with a specific focus on navigating the complex permitting requirements associated with solar development projects, you have the profile we are looking for.

### Key Responsibilities

- **Permitting Process Management:** Lead and manage the permitting process for large-scale solar projects, ensuring compliance with regulatory requirements at the local, regional, and national levels.
- **Stakeholder Engagement:** Build and maintain positive relationships with regulatory agencies, landowners, community stakeholders, and other relevant parties involved in the permitting process.
- **Project Planning and Coordination:** Develop comprehensive project plans and timelines, coordinate project activities, and track progress towards key milestones.
- **Risk Management:** Identify potential risks and challenges associated with the permitting process and develop strategies to mitigate risks and ensure project success.
- **Documentation and Compliance:** Ensure accurate and timely completion of permit applications, environmental assessments, and other required documentation to secure necessary approvals for project development.
- **Team Leadership:** Provide leadership and guidance to project team members, consultants, and external partners involved in the permitting process.
- **Budget and Resource Management:** Monitor project budgets, allocate resources effectively, and optimize project efficiency to achieve cost-effective project outcomes.
- **Continuous Improvement:** Identify opportunities for process improvement and optimization to streamline the permitting process and enhance project delivery effectiveness.

### Profile Requirements

- Bachelor's degree in Engineering, Environmental Science, Business Administration, or related field. Advanced degree preferred.
- Minimum of 5 years of experience in project management, preferably within the renewable energy industry
- Proven track record of successfully managing large-scale projects through the permitting process to achieve project milestones and objectives.
- Strong understanding of regulatory requirements and permitting processes related to solar energy projects.
- Excellent communication, negotiation, and interpersonal skills, with the ability to effectively engage and collaborate with internal and external stakeholders.
- Exceptional organizational and time management skills, with the ability to prioritize tasks, manage multiple projects simultaneously, and meet tight deadlines.
- Proficiency in project management tools and software applications.
- Commitment to sustainability and environmental stewardship.

### What we offer

- We're 100% on board with remote work
- Competitive salary with extra benefits
- Full time position in a well established company, that is in a thriving path
- Professional growth, being part of an international collaborative team committed to sustainability and innovation
